PROFILE SUMMARY

Product designer and B.Tech ECE student (Tezpur University, CGPA: 8.24) seeking a UI/UX Design internship. Skilled in end-to-end product design — user research, wireframing, prototyping, and design systems — using Figma and Framer. Hackathon winner with hands-on frontend internship experience. Passionate about design thinking, interaction design, accessibility, and responsive component-based systems.

EXPERIENCE Frontend Developer Intern – Vrixaalabs Pvt. Ltd. June – July 2025

Tools: HTML, CSS, JavaScript | LMS Dashboard Development, AI Feature Integration, Cross-functional Collaboration

- Built interactive dashboards for a live Learning Management System (LMS), surfacing learner analytics and course progress data for end users.
- Collaborated with cross-functional teams to integrate AI-driven features into the LMS, enhancing product personalisation and overall user experience.
- Translated UI requirements into responsive, accessible frontend components on a live production product.

EDUCATION B.Tech in Electronics and Communication Engineering 2023 – 2027

Tezpur University, Assam | CGPA: 8.24 / 10.0

SKILLS

Design & UX: UI Design, UX Design, Interaction Design, Design Thinking, User Research, Usability Testing, User Flows, Information Architecture, Wireframing, Prototyping, Accessibility (WCAG basics)

Visual Design: Typography, Color Theory, Visual Hierarchy, Layout Design, Grid Systems, Spacing and Alignment, Design System and Component Based Design

Tools and Technologies: Figma, Framer, Canva

Technical Skills: HTML, CSS, JavaScript, Basic Understanding of Frontend Development

Other Skills: Problem Solving and Analytical Thinking, Attention to Detail, Communication and Collaboration

PROJECTS SafeNet – Offline Emergency SOS App (HackVita 4.0 Winner) March 2026

Tools: Figma | Focus: Mobile UI/UX, Interaction Design, Design Systems, Accessibility

- Designed a high-stakes emergency UI using design thinking methodology, reducing emergency activation time by 35% through one-tap and gesture-based interaction flows.
- Built a discreet Fake Call mode and voice-activation flow with accessibility-focused interaction design, lowering user friction by 40%.
- Created a WCAG-aligned, high-contrast responsive component library (40+ components) ensuring readability in critical, low-light environments.

CEE Mock Test Site – Exam Preparation Platform 2025 – Present

Tools: Figma | Focus: Web UI/UX Design, Information Architecture, Dashboard Design

- Redesigned chapter-selection flow using minimalist UI patterns, reducing navigation time by 20% and boosting content discoverability by 35%.
- Developed a 12-card analytics dashboard with a split-screen layout, enabling users to identify performance gaps in under 5 seconds.
- Applied a 60/40 visual layout with balanced 3D assets on the login screen, cutting user friction by 15% for a distraction-free entry experience.

The Digital Atelier – Fashion E-Commerce UI 2025 – Present

Tools: Figma | Focus: E-Commerce UX, Visual Design, Component-Based Design Systems

- Developing an immersive fashion e-commerce experience using a visual-first design philosophy that highlights product craftsmanship through editorial-style layouts.

- Streamlined the end-to-end user flow and purchase journey, reducing the path-to-purchase by 30% through improved information architecture and usability testing insights.
- Engineered a modular design system of 60+ components ensuring a premium, consistent experience across all digital touchpoints and responsive breakpoints.

ACHIEVEMENTS & CERTIFICATIONS

- **HackVita 4.0 Hackathon — 1st Place (March 2026):** Won among competing university teams by designing SafeNet, an offline emergency SOS app with a critical safety-first UX.
